
MIXER A 16 CANALI CON DSP E MATRIX OUT

Compact analog mixer with integrated 32-bit DSP and full duplex audio card, 99 effects, Bluetooth connectivity and media player. 4 independent selectable auxiliary output groups with matrix selector. 9-band master equalizer. +48V phantom power supply.

Reference: ZZMXPRO16

PROFESSIONAL mixers with DSP multieffects and Bluetooth. The ideal solution to have everything under control. Great for fixed installations as well as versatile for mobile applications, they can easily manage microphones for a theatrical production or inputs for a band's concert. The 2 AUX outputs guarantee excellent autonomy for live performances and for connecting outboard gear in the studio. Internal effects, Bluetooth connectivity, integrated sound card, and mp3 player complete the impressive features of these powerful and versatile mixers.

Compact analog mixer with built-in 32-bit DSP and full duplex sound card, 99 effects, bluetooth connectivity and media player. 4 groups of independently selectable auxiliary outputs, with matrix selector. 9-band EQ on the master. +48V phantom power
