INTELLIGENT AUDIO

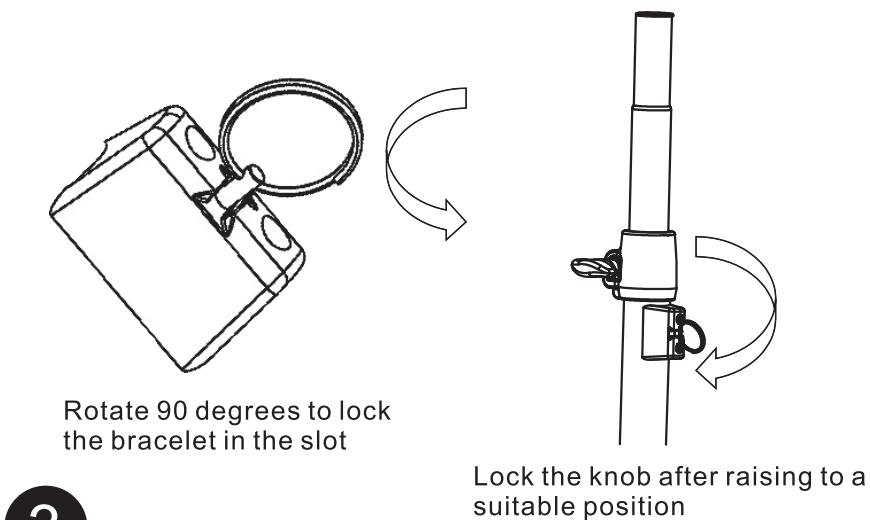

This speaker stand with a flat base plate is stable and compact and does not take up much space. Compressed gas spring tube combination can be extended to 2.0m and can support loudspeakers up to 10kg. Structural design of knob and bolt with bracelet provides for comfortable and safe height adjustment. Additional features include a practical integrated handle, a cable management and four stable feet covered in felt. The gas spring tube has M20 thread, so it can be used as a connection between the bass and the full-range speaker.

Loosen the knob

Press the telescopic tube by hand or by speaker and pull up the bracelet

Rotate 90 degrees to lock the bracelet in the slot

Lock the knob after raising to a suitable position
