infinity

Raccoon Junior P4/7

Product code: 200551

Preface

Thank you for purchasing this Infinity product.

The purpose of this user manual is to provide instructions for the correct and safe use of this product.

Keep the user manual for future reference as it is an integral part of the product. The user manual shall be stored at an easily accessible location.

This user manual contains information concerning:

- Safety instructions
- Intended and non-intended use of the device
- Installation and operation of the device
- Maintenance procedures
- Troubleshooting
- Transport, storage and disposal of the device

Non-observance of the instructions in this user manual may result in serious injuries and damage of property.

For the latest version of this document or other language versions, please visit our website www.highlite.com or contact us at service@highlite.com.

Product code: 200551

Table of contents

1.   Introduction

1.1.   Before Using the Product

> **Important**
> **Read and follow the instructions in this user manual before installing, operating or servicing this product.**

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual.

After unpacking, check the contents of the box. If any parts are missing or damaged, contact your Highlite International dealer.

Your shipment includes:

Figure 1

- Infinity Raccoon Junior P4/7
- Power Pro True cable (1,5 m)
- Quick-lock bracket
- User manual
1.2.   Intended Use

This device is intended for professional use as an LED luminaire for stage lighting. It can be installed indoors and outdoors. This device is not suitable for households and for general lighting.

Any other use, not mentioned under intended use, is regarded as non-intended and incorrect use.

1.3.   LEDs Lifespan

The light output of the LEDs gradually decreases over time (lumen depreciation). High operating temperatures contribute to this process. You can extend the lifespan of the LEDs by providing adequate ventilation and operating the LEDs at the lowest possible brightness.

1.4.   Text Conventions

Throughout the user manual the following text conventions are used:

- Buttons: All buttons are in bold lettering, for example "Press the **UP/DOWN** buttons"
- References: References to parts of the device are in bold lettering, for example: "turn the **adjustment handle (05)**". References to chapters are hyperlinked
- 0–255:   Defines a range of values
- Notes: **Note:** (in bold lettering) is followed by useful information or tips

1.5. Symbols and Signal Words

Safety notes and warnings are indicated throughout the user manual by safety signs.

Always follow the instructions provided in this user manual.

⚠️	**DANGER**	Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.
⚠️	**WARNING**	Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
⚠️	**CAUTION**	Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.
❗	**Attention**	Indicates important information for the correct operation and use of the product.
📖	**Important**	Read and observe the instructions in this document.
⚡	**Electrical hazard**	
🗑️		Provides important information about the disposal of this product.

1.6. Symbols on the Information Label

This product is provided with an information label. The information label is located on the mounting bracket of the device.

The information label contains the following symbols:

🗑️	This device shall not be treated as household waste.
📖	Read and follow the instructions in the user manual before installing, operating or servicing the device.
⏚	This device falls under IEC protection class I.
IP65	This devices is rated IP65.

2. Safety

> **Important**
> **Read and follow the instructions in this user manual before installing, operating or servicing this product.**

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual.

2.1. Warnings and Safety Instructions

> **DANGER**
> **Danger for children**

For adult use only. The device must be installed beyond the reach of children.

- Do not leave any parts of the packaging (plastic bags, polystyrene foam, nails, etc.) within the reach of children. Packaging material is a potential source of danger for children.

> **DANGER**
> **Electric shock caused by dangerous voltage inside**

There are areas inside the device where dangerous touch voltage may be present.

- Do not open the device or remove any covers.
- Do not operate the device if the covers or the housing are open. Before operation, check if the housing is firmly closed and all screws are tightly fastened.
- Disconnect the device from the electrical power supply before service and maintenance, and when the device is not in use.

> **DANGER**
> **Electric shock caused by short-circuit**

This device falls under IEC protection Class I.

- Make sure that the device is electrically connected to ground (earth). Connect the device only to a socket-outlet with a ground (earth) connection.
- Do not cover the ground (earth) connection.
- Do not bypass the thermostatic switch or fuses.
- Do not let the power cable come into contact with other cables. Handle the power cable and all connections with the mains with caution.
- Do not modify, bend, mechanically strain, put pressure on, pull or heat up the power cable.
- Make sure that the power cable is not crimped or damaged. Examine the power cable periodically for any defects.
- Do not immerse the device in water or other liquids. Do not install the device in a location where flooding may occur.
- Do not use the device during thunderstorms. Disconnect the device from the electrical power supply immediately.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.

> **WARNING**
> **Risk of epileptic shock**

Strobe lighting can trigger seizures in photosensitive epilepsy. Sensitive persons should avoid looking at strobe lights.

> **Attention**
> **Power supply**

- Before connecting the device to the power supply, make sure that the current, voltage and frequency match the input voltage, current and frequency specified on the information label on the device.
- Make sure that the cross-sectional area of the extension cords and power cables is sufficient for the required power consumption of the device.

> **Attention**
> **General safety**

- Do not connect the device to a dimmer pack.
- Do not switch the device on and off in short intervals. This reduces the device's life.
- Do not shake the device. Avoid brute force when installing or operating the device.
- Change the lens or the LEDs if they are visibly damaged to such an extent that their effectiveness is impaired, for example by cracks or deep scratches. Contact your Highlite International dealer for more information, as servicing can be performed only by instructed or skilled persons.
- If the device is dropped or struck, disconnect the device from the electrical power supply immediately.
- If the device is exposed to extreme temperature variations (e.g. after transportation), do not switch it on immediately. Let the device reach room temperature before switching it on, otherwise it may be damaged by the formed condensation.
- If the device fails to work properly, discontinue use immediately.

> **Attention**
> **For professional use only**
> **This device must be used only for the purposes it is designed for.**

This device is intended for professional use as an LED luminaire for stage lighting. Any incorrect use may lead to hazardous situations and result in injuries and material damage.

- This device is not suitable for households and for general lighting.
- This device is not designed for permanent operation.
- This device does not contain user-serviceable parts. Unauthorized modifications to the device will render the warranty void. Such modifications may result in injuries and material damage.

> **Attention**
> **Before each use, examine the device visually for any defects.**

Make sure that:

- All screws used for installing the device or parts of the device are tightly fastened and are not corroded.
- The safety devices are not damaged.
- There are no deformations on housings, fixings and installation points.
- The lens is not cracked or damaged.
- The power cables are not damaged and do not show any material fatigue.

> **Attention**
> **Do not expose the device to conditions that exceed the rated IP class conditions.**

This device is IP65 rated. IP (Ingress Protection) 65 class means that the device is dust-tight and protected against harmful effect of water jets.

Keep the connectors sealed with the rubber caps when the connectors are not in use.

2.2. Requirements for the User

This product may be used by ordinary persons. Maintenance may be carried out by ordinary persons. Installation and service shall be carried out only by instructed or skilled persons. Contact your Highlite International dealer for more information.

Instructed persons have been instructed and trained by a skilled person, or are supervised by a skilled person, for specific tasks and work activities associated with the installation, service and maintenance of this product, so that they can identify risks and take precautions to avoid them.

Skilled persons have training or experience, which enables them to recognize risks and avoid hazards associated with the installation, service and maintenance of this product.

Ordinary persons are all persons other than instructed persons and skilled persons. Ordinary persons include not only users of the product but also any other persons that may have access to the device or who may be in the vicinity of the device.

2.3. Personal Protective Equipment

During installation, deinstallation and rigging wear personal protective equipment in compliance with the national and site-specific regulations.

3.   Description of the Device

The Infinity Raccoon Junior P4/7 is an IP65-rated, high-CRI, LED par effect, suitable for indoor and outdoor applications. The device is equipped with 4 LEDs that have 7 colors each: Red, Green, Blue, Lime, Amber, Cyan, and Royal Blue. You can switch between maximum brightness and maximum light quality (high CRI) mode. The calibrated XY color engine guarantees stable color output at every temperature of the LEDs and every brightness setting, without any visible color shift when dimming.

3.3.   Product Specifications

Model:	Raccoon Junior P4/7

Source:	
Light source type	LED
Light source quantity	4
Light source power	25 W
LED color type	RGBCALDB
Illuminance @ 2 m	7119 lx
Illuminance @ 3 m	3164 lx
Illuminance @ 5 m	1139 lx
Luminous flux (total)	2398 lm
Luminous flux (Red)	317 lm
Luminous flux (Green)	645 lm
Luminous flux (Blue)	264 lm
Luminous flux (Amber)	560 lm
Luminous flux (Lime)	900 lm
Luminous flux (Royal Blue)	173 lm
Luminous flux (Cyan)	502 lm
CRI	95
Minimum CCT	2000 K
Maximum CCT	8000 K

Optical:	
Beam angle (circular)	15°

Control and Programming:	
Control mode	DMX / Manual / Static Dimmer
DMX channels	1 / 3 / 8 / 8 / 10 / 12 / 12 / 14
Protocols	DMX / RDM
Display	OLED

Dynamic Effects:	
Dimmer	0–100 %
Strobe	0–25 Hz

Electrical Specifications and Connections:	
Power supply	100–240 V AC 50/60 Hz
Power consumption	90 W
Power connector IN	Power Pro True
Power connector OUT	Power Pro True
DMX connector IN	XLR 5P
DMX connector OUT	XLR 5P

Mechanical Specifications:	
Length	194 mm
Width	232 mm
Height	285 mm
Weight	4 kg
IP rating	IP65
Housing	Aluminum die-cast
Color	Black

Product Properties:

Cooling	Convection

Thermal Specifications:

Maximum ambient temperature	45 °C
Minimum operating temperature	-20 °C

Included Items:

Included cables	Power Pro True cable
Included rigging	Quick-lock bracket

3.5. Optional Accessories

The following optional accessories are available for this product:

- 200570 Top Hat for Raccoon Junior
- 200571 Accessory Holder for Raccoon Junior
- 200572 15° Diffuser for Raccoon Junior
- 200573 20° Diffuser for Raccoon Junior
- 200574 40° Diffuser for Raccoon Junior
- 200575 90° Diffuser for Raccoon Junior
- 200576 15°x60° Diffuser for Raccoon Junior
- 200577 Barndoor for Raccoon Junior

Contact your Highlite International dealer for more information.

4. Installation

4.1. Safety Instructions for Installation

> ⚠ **WARNING**
> **Incorrect installation can cause serious injuries and damage of property.**

If trussing systems are used, installation must be carried out only by instructed or skilled persons.

Follow all applicable European, national and local safety regulations concerning rigging and trussing.

4.2. Personal Protective Equipment

During installation, deinstallation and rigging wear personal protective equipment in compliance with the national and site-specific regulations.

4.3. Installation Site Requirements

- The device can be used indoors and outdoors.
- The device must be installed away from heating sources and direct sunlight.
- The ambient temperature must be in the range -20 and 45 °C.

4.4. Rigging

The device can be positioned on a flat surface or mounted to a truss or other rigging structure in any orientation. Make sure that all loads are within the pre-determined limits of the supporting structure.

> ⚠ **CAUTION**
> **Restrict the access under the work area during rigging/derigging.**

To mount the device, follow the steps below:

01) Fasten the quick-lock bracket, supplied with the device, on the **mounting bracket (04).**
02) Install the clamp. Make sure that you use a clamp suitable for attaching the device to a truss.

Figure 5

Clamp

Quick-lock bracket
Safety cable

03) Attach the device to the supporting structure. Make sure that the device cannot move freely.
04) Secure the device with a secondary suspension, for example a safety cable. Make sure that the secondary suspension can hold 10 times the weight of the device. If possible, the secondary suspension should be attached to a supporting structure independent of the primary suspension. Put the safety cable through the **safety eye (08)**.

4.5. Angle Adjustment

You can adjust the angle of the device with the 2 **adjustment screws (02).**

01) Turn the 2 **adjustment screws (02)** counterclockwise to loosen them.
02) Tilt the device to the desired angle. The tilt angles are marked on the **mounting bracket (04)**.
03) Turn the 2 **adjustment screws (02)** clockwise to tighten them. Make sure that the device cannot move freely after the 2 **adjustment screws (02)** are tightened.

Figure 6
4.6. Installation of Accessories

There are a number of accessories available for the device. The accessories are not supplied with the device. Contact your Highlite International dealer for more information.

You need to install an accessory holder before you can attach a barndoor or a top hat to the device. The accessory holder allows you to attach a barndoor or a top in combination with a diffuser. If you want to attach only a diffuser, it is not necessary to install first an accessory holder.

4.6.1. Accessory Holder Installation

To install the accessory holder, follow the steps below:

01) Put the accessory holder against the lens of the device and align the openings for the screws on the accessory holder with the 4 **openings for screws (03)** on the device.
02) Use a screwdriver to tighten the 4 screws, supplied with the accessory holder.
03) Secure the accessory holder to the overhead structure with a secondary attachment, for example a safety cable.
Figure 7

4.6.2. Barndoor Installation

To install the barndoor, follow the steps below:

01) Install the accessory holder (see 4.6.1. Accessory Holder Installation on page 14).
02) Lift the spring-loaded retainer clip on the accessory holder and flip it backwards.
03) Insert the barndoor into the accessory holder.
04) Pull the spring-loaded retainer clip of the accessory holder downwards. The barndoor is locked in position.
05) Secure the barndoor to the overhead structure with a secondary attachment, for example a safety cable.

Figure 8
4.6.3. Top Hat Installation

To install the top hat, follow the steps below:

01) Install the accessory holder (see <u>4.6.1. Accessory Holder Installation</u> on page 14).
02) Lift the spring-loaded retainer clip on the accessory holder and flip it backwards.
03) Insert the top hat into the accessory holder.
04) Pull the spring-loaded retainer clip of the accessory holder downwards. The top hat is locked in position.
05) Secure the top hat to the overhead structure with a secondary attachment, for example a safety cable.

Figure 9
4.6.4. Diffuser Installation

To install the diffuser, follow the steps below:

01) Install the accessory holder (see <u>4.6.1. Accessory Holder Installation</u> on page 14). This step is optional. Do this step only if you want to use the diffuser together with a barndoor or a top hat.
02) Put the diffuser on the lens of the device or on the opening of the accessory holder, if installed. The magnet of the diffuser will hold the diffuser in position.
03) Secure the diffuser to the overhead structure with the safety cable supplied with the diffuser.

Note:

This figure shows installation of the diffuser without the accessory holder.

Figure 10

Product code: 200551

4.7. Connecting to Power Supply

	DANGER **Electric shock caused by short-circuit**

The device accepts AC mains power at 100–240 V and 50/60 Hz. Do not supply power at any other voltage or frequency to the device.

This device falls under IEC protection class I. Make sure that the device is always electrically connected to the ground (earth).

Before connecting the device to the socket-outlet:
- Make sure that the power supply matches the input voltage specified on the information label on the device.
- Make sure that the socket-outlet has ground (earth) connection.

Connect the device to the socket-outlet with the power plug. Do not connect the device to a dimmer circuit, as this may damage the device.

This device is IP65 rated.

- Do not expose the device to conditions that exceed the rated IP class conditions.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.
- Make sure that the cable run is not too heavy. A heavy cable run can cause damage to the connectors. If the connectors are damaged, their ingress protection (IP) can deteriorate.

4.8. Power Linking of Multiple Devices

This device supports power linking. Power can be relayed to another device via the power OUT connector. Note that the input and the output connectors have different designs: one type cannot be connected to the other.

Power linking of multiple devices must be carried out only by instructed or skilled persons.

	WARNING **Incorrect power linking may lead to overload of the electrical circuit and result in serious injuries and damage of property.**

To prevent overload of the electrical circuit, when power linking multiple devices:

- Use cables with sufficient current-carrying capacity. The power cable supplied with the device is not suitable for power linking of multiple devices.
- Make sure that the total current draw of the device and all connected devices does not exceed the rated capacity of the power cables and the circuit breaker.
- Do not link more devices on one power link than the maximum recommended number.

Maximum recommended number of devices:
- at 100–120 V: 3 devices Raccoon Junior P4/7
- at 200–240 V: 6 devices Raccoon Junior P4/7

5. Setup

5.1. Warnings and Precautions

> ⚠️ **DANGER**
> **Electric shock caused by short-circuit**

This device is IP65 rated.

- Do not expose the device to conditions that exceed the rated IP class conditions.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.
- Make sure that the cable run is not too heavy. A heavy cable run can cause damage to the connectors. If the connectors are damaged, their ingress protection (IP) can deteriorate.

> ❗ **Attention**
> **Connect all data cables before supplying power.**
> **Disconnect power supply before connecting or disconnecting data cables.**

5.2. Stand-alone Setup

When the Raccoon Junior P4/7 is not connected to a controller or to other devices, it functions as a stand-alone device. It can be operated manually via the control panel or in auto mode.

For more information refer to Control Modes (see).

5.3. DMX Connection

5.3.1. DMX-512 Protocol

You need a DMX serial data link to run light shows of one or more devices using a DMX-512 controller.

The Raccoon Junior P4/7 has 5-pin DMX signal IN and OUT connectors.

The pin assignment is as follows: pin 1 (ground), pin 2 (-), pin 3 (+), pin 4 (N/C), pin 5 (N/C).

Devices on a serial data link must be daisy-chained in a single line. The number of devices that you can control on one data link is limited by the combined number of the DMX channels of the connected devices and the 512 channels available in one DMX universe.

To comply with the TIA-485 standard, no more than 32 devices should be connected on one data link. In order to connect more than 32 devices on one data link, you must use a DMX optically isolated splitter/booster, otherwise this may result in deterioration of the DMX signal.

Note:

- Maximum recommended DMX data link distance: 300 m
- Maximum recommended number of devices on a DMX data link: 32 devices

5.3.2. DMX Cables

Shielded twisted-pair cables with 5-pin XLR connectors must be used for reliable DMX connection. You can purchase DMX cables directly from your Highlite International dealer or make your own cables.

If you use XLR audio cables for DMX data transmission, this may lead to signal degradation and unreliable operation of the DMX network.

When you make your own DMX cables, make sure that you connect the pins and wires correctly as shown in the figure below.

Figure 11

Pin 1: GND (screen)
Pin 2: Signal (-)
Pin 3: Signal (+)
Pin 4: N/C

Pin 3: Signal (+)

Pin 1: GND (screen)
Pin 2: Signal (-)
Pin 3: Signal (+)
Pin 4: N/C
Pin 5: N/C
5.3.3. DMX Linking

To connect multiple devices on one DMX data link, follow the steps below:

01) Use a 5-pin DMX cable to connect the DMX OUT connector of the lighting controller to the DMX IN connector of the 1st device.
02) Connect the DMX OUT connector of the 1st device to the DMX IN connector of the 2nd device with a 5-pin DMX cable.
03) Repeat step 2 to connect all devices in a daisy-chain.
04) Connect a DMX terminator (120 Ω resistor) to the DMX OUT connector of the last device on the data link.

Figure 12

120 Ω
5.3.4. DMX Addressing

In a setup with multiple devices, make sure that you set the DMX starting address of each device correctly. The Raccoon Junior P4/7 has 8 personalities: Dimmer (1 channel), Pixel (3 channels), Basic (8 channels), XY (8 channels), RGB (12 channels), CMY (12 channels), HSI (10 channels), Raw (14 channels).

If you want to connect multiple devices on one data link and use them in 14-channel mode (Raw), follow the steps below:

01) Set the starting address of the 1st device on the data link to 1 (001).
02) Set the starting address of the 2nd device on the data link to 15 (015), as 1 + 14 = 15.
03) Set the starting address of the 3rd device on the data link to 29 (029), as 15 + 14 = 29.
04) Continue assigning the starting addresses of the remaining devices by adding each time 14 to the previous number.

Make sure that you do not have any overlapping channels in order to control each Raccoon Junior P4/7 correctly. If two or more devices are addressed similarly, they will work similarly.

6. Operation

6.1. Safety Instructions for Operation

> **!** **Attention**
> **This device must be used only for the purposes it is designed for.**

This device is intended for professional use as an LED luminaire for stage lighting. It can be installed indoors and outdoors. This device is not suitable for households and for general lighting.

Any other use, not mentioned under intended use, is regarded as non-intended and incorrect use.

> **!** **Attention**
> **Power supply**

Before connecting the device to the power supply, make sure that the current, voltage and frequency match the input voltage, current and frequency specified on the information label on the device.

6.2. Control Modes

The Raccoon Junior P4/7 can be operated with a DMX controller or as a stand-alone device.

The Raccoon Junior P4/7 supports the following control modes:

- Stand-alone: Manual operation, auto operation mode (built-in programs, color presets)
- DMX-512:   Dimmer (1 channel), Pixel (3 channels), Basic (8 channels), XY (8 channels), RGB (12 channels), CMY (12 channels), HSI (10 channels), Raw (14 channels)

For more information about how to connect the devices, refer to Setup (see 5. Setup on page 18).

To operate the device as a stand-alone device:

- Adjust the dimmer values, select a preset color, adjust the color temperature and the tint of the white point, or create a custom color in the Static Color submenu (see 6.6.3.1. Static Color Mode on page 27)
- Select one of the 3 built-in effects (see 6.6.3.2. Built-in Effects on page 27) in Manual mode and adjust the parameters of the selected built-in effect

To operate the device with a DMX controller:

01) Select the DMX channel mode in the DMX Mode menu (see 6.6.1. DMX Mode on page 26). Refer to the DMX chart (see 6.7. DMX Channels on page 34) for a complete overview of all DMX channels.
02) Set the DMX starting address (see 5.3.4. DMX Addressing on page 20) of the device in DMX Address menu (see 6.6.2. DMX Address on page 26).
03) Set the behavior of the device in case there is no DMX signal in the DMX Lost menu (see 6.6.12. DMX Lost on page 32).

6.3. Control Panel

Figure 13

A) OLED display
B) DOWN button
C) UP button
D) SET button
E) MODE button
- Use the **MODE** button to exit the current submenu, to return to the Main Menu and to navigate through the Main Menu.
- Use the **UP/DOWN** buttons to navigate through the menus or to increase/decrease numeric values.
- Use the **SET** button to open the desired menu, to confirm your choice or to set the currently selected value.

6.4. Start-up

Upon start-up, the display shows a splash screen with the Infinity logo and the name of the device.

Immediately afterwards, the display shows the start screen. The start screen provides information about the current control mode of the device, the behavior of the device in case there is no DMX signal, the PWM frequency and the temperature of the LEDs.
Press any button to enter the main menu.

Note:

If no button is pressed, after 20 s the display returns to the start screen. After 5 s more the backlight of the display turns off. If the DMX signal is lost, the display is blinking. You can change this setting in the Backlight submenu (see 6.6.11.1. Backlight on page 31).

6.6. Main Menu Options

The main menu has the following 15 options:

```
          Menu
*DMX Mode         Basic
 DMX Address        1-8
 Manual
 Dimmer Curve  Square
 Dimmer Speed    Fast
 Color Space ProPhoto
 Tungsten           Off
 LED Mode      Quality
 Calibration        On
 LED Frequency
 Display
 DMX Lost          Hold
 Information
 Send Settings
 Factory Settings
```

DMX Mode

DMX Lost
Information
Send Settings
Factory Settings

01) Press the **UP/DOWN** buttons to navigate through the main menu.
02) Press the **SET** button to open the submenus.

6.6.1. DMX Mode

In this menu you can select the DMX channel mode.

01) Press the **UP/DOWN** buttons to select the desired DMX channel mode. There are 8 options:

```
    DMX Mode              UP/        DMX Mode
 *Dimmer (1)             DOWN      RGB (12)
  Pixel (3)              ▭        CMY (12)
  Basic (8)                        HSI (10)
  XY (8)                           Raw (14)
```
- Dimmer (1):   1 channel
- Pixel (3):   3 channels
- Basic (8):   8 channels
- XY (8):   8 channels
- RGB (12):   12 channels
- CMY (12):   12 channels
- HSI (10):   10 channels
- Raw (14):   14 channels

02) Press the **SET** button to confirm the selection. For more information refer to the DMX chart (see 6.7. DMX Channels on page 34).

6.6.2. DMX Address

In this menu you can set the DMX starting address of the device.

01) Press the **UP/DOWN** buttons to select the DMX starting address of the device. The selection range depends on the active DMX channel mode.
- Dimmer: 001–512 (1 channel)
- Pixel: 001–510 (3 channels)
- Basic: 001–505 (8 channels)
- XY: 001–505 (8 channels)
- RGB: 001–501 (12 channels)
- CMY: 001–501 (12 channels)
- HSI: 001–503 (10 channels)
- Raw: 001–499 (14 channels)

02) Press the **SET** button to confirm.

Note:

The display shows the DMX address range of the device. For example, "2–13" means that the DMX starting address of the device is 002 and the device is operating in a 12-channel mode. The DMX address range of the device is 002–013.

```
    DMX Address

      2 - 13
```
6.6.3. Manual Mode

In this menu you can use the device in Static Color mode or activate one of the 3 built-in effects.

01) Press the **UP/DOWN** buttons to select one of the 4 options:

```
        Manual
 *Static
  Effect 1
  Effect 2
  Effect 3
```

- Static   (see 6.6.3.1. Static Color Mode)
- Effect 1, 2, 3   (see 6.6.3.2. Built-in Effects)

02) Press the **SET** button to confirm the selection.

6.6.3.1. Static Color Mode

In this submenu you can manually adjust the dimmer values, select a preset color, or adjust the color temperature and the tint.

```
        Static
 *Dimmer        100.0 %
  White Point
  Preset Color    OPEN
  Raw Color
```
01) Press the **UP/DOWN** buttons to select one of the 4 submenus:
- Dimmer: Adjust the light output from low to high intensity (0,0–100,0 %, at steps of 0,1 %)
- White Point: Select the color temperature (2000 K, 2200 K, 2400 K, 2600 K, 2800 K, 3000 K, 3200 K, 3600 K, 4200 K, 5600 K, 6500 K, 8000 K) and the tint (from -100,0 to +100,0 %, at steps of 0,1 %)
- Preset Color: Select one of the Lee Color Presets (see 6.7.4. Lee Color Presets on page 39) or no color preset (OPEN)
- Raw Color: Set the intensity of the LEDs for each color (Red, Green, Blue, Lime, Amber, Cyan, Royal Blue), from low to high intensity (0–255)

02) Press the **SET** button to confirm the selection.

6.6.3.2. Built-in Effects

01) Press the **UP/DOWN** buttons to select Effect 1, Effect 2 or Effect 3 to run the built-in effect. This opens a submenu where you can adjust the parameters of the selected built-in effect:
```
        Effect 1
 *Dimmer        100.0 %
  Period         30.0 s
  Fade in         100 %
  Fade out        100 %
```
- Dimmer: Adjust the light output from low to high intensity (0,0–100,0 %, at steps of 0,1 %)
- Period: Set a timer for the duration of the effect (2,0–60,0 s, at steps of 0,1 s)
- Fade in: Select the fade-in speed from fast to slow (0–100 %, at steps of 1 %)
- Fade out: Select the fade-out speed from fast to slow (0–100 %, at steps of 1 %)

02) Press the **SET** button to confirm the value.

6.6.4. Dimmer Curve

In this menu you can select the dimming curve.

01) Press the **UP/DOWN** buttons to select one of the 4 options:

```
 Dimmer Curve
 Linear
 S-Curve
*Square
 Inverse Square
```
- Linear
- S-Curve
- Square
- Inverse Square

Figure 14

Linear Curve — Lumen Output vs DMX Value

S-Type — Lumen Output vs DMX Value

Square Law — Lumen Output vs DMX Value

Inv. Square Law — Lumen Output vs DMX Value
02) Press the **SET** button to confirm the selection.

6.6.5. Dimmer Speed

In this menu you can set the dimmer speed.

01) Press the **UP/DOWN** buttons to choose one of the 4 options:
- Auto: Fast dimmer with jump detection
- Fast: Fast dimmer
- Medium: Medium dimmer
- Slow: Slow dimmer

02) Press the **SET** button to confirm the selection.

6.6.6. Color Space

In this menu you can define the color space.

01) Press the **UP/DOWN** buttons to select one of the 5 options:
- Native
- sRGB
- Rec. 2020
- ProPhoto RGB
- Native Linear

02) Press the **SET** button to confirm the selection.

Notes:

- The Native color space is the complete subset of colors that can be created with individual LEDs installed in the device.
- The sRGB, Rec. 2020, and ProPhoto RGB allow you to select colors from the respective subset. If the selected color is not in the subset, the software creates a close match. It means that the color created by the software may differ from the originally selected color.
- The Native Linear color space always interpolates to D65 white point if the values are identical across RGB (i.e. 50 % RGB = D65). The Native color space does this within the virtual RGB emitters in the Native color space.

To avoid color differences, make sure that all devices in your setup use the same color space.

This figure shows a comparison of the color spaces in a CIE 1931 xy chromaticity diagram.

Figure 15
6.6.7. Tungsten

In this menu you can select Tungsten simulation at different outputs.

01) Press the **UP/DOWN** buttons to select one of the 4 options:

```
     Tungsten
*Off
 575/750W
 1000W
 2000W
```

- Off
- 575/750 W
- 1000 W
- 2000 W

02) Press the **SET** button to confirm the selection.

Note:

If you select Tungsten simulation, the device will use custom parameters for dimmer curve and dimmer speed. You can adjust the dimmer curve and the dimmer speed if Tungsten simulation is not selected (Off).

6.6.8. LED Mode

In this menu you can set the LED performance mode.

01) Press the **UP/DOWN** buttons to select one of the 2 options:

```
     LED Mode
*High Quality
 High Brightness
```
- High Quality: The device reaches a CRI between 96 and 97,7 at 3000 K
- High Brightness: The CRI is reduced to 93 and depending on the color temperature, the intensity of the light output increases with 20–30 %

Figure 16
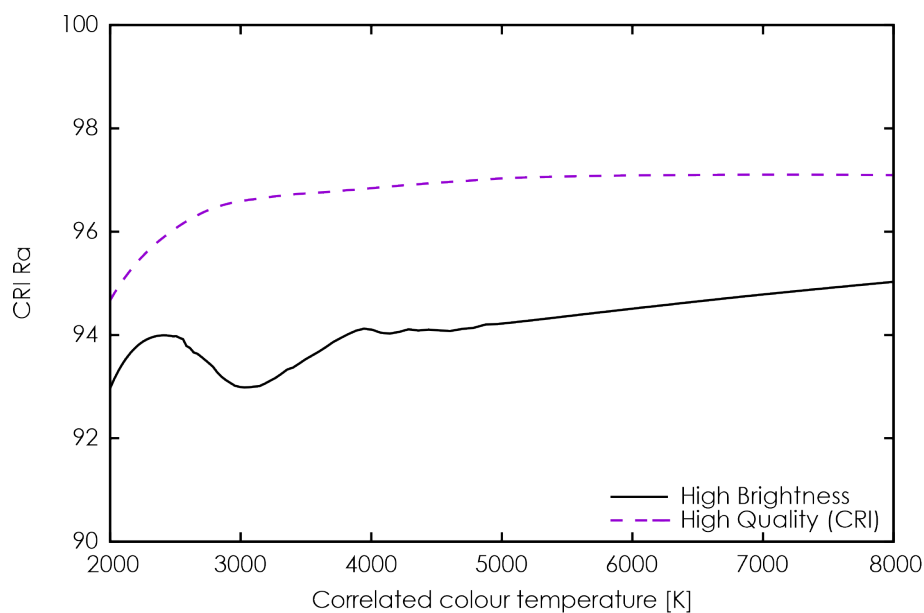

02) Press the **SET** button to confirm the selection.

6.6.9. Calibration

In this menu you can enable the built-in calibration. The built-in calibration guarantees that the color rendering, the color temperature and the brightness of the LEDs remain the same despite differences in the temperature of the LEDs or between different production runs of the same device.

01) Press the **UP/DOWN** buttons to choose one of the 2 options:
- Off: The built-in calibration is disabled
- On: The built-in calibration is enabled. It is recommended to use this setting
02) Press the **SET** button to confirm.

6.6.10. LED Frequency

In this menu you can adjust the PWM (pulse-width modulation) frequency of the LEDs.

01) Press the **UP/DOWN** buttons to select one of the 6 options:
- 640 Hz
- 1280 Hz
- 2500 Hz
- 5 kHz
- 10 kHz
- 25 kHz
02) Press the **SET** button to confirm the selection.

6.6.11. Display

In this menu you can adjust the display settings of the device.

01) Press the **UP/DOWN** buttons to select one of the 3 options:

```
          Display
 *Backlight        Auto
  Display FlipRegular
  Key Lock      Unlocked
```

- Backlight   (see 6.6.11.1. Backlight)
- Display Flip   (see 6.6.11.2. Display Flip)
- Key Lock   (see 6.6.11.3. Key Lock)
02) Press the **SET** button to open the selected submenu.

6.6.11.1. Backlight

In this submenu you can adjust the behavior of the display.

01) Press the **UP/DOWN** buttons to select one of the 3 options:
- Auto: The display returns to the start screen after 20 s of inactivity. After 5 s more the backlight of the display turns off. If the DMX signal is lost, the display starts blinking
- Stay On: The display does not return to the start screen and the backlight remains on
- Stay Off: The display returns to the start screen after 20 s of inactivity. After 5 s more the backlight of the display turns off and remains off
02) Press the **SET** button to confirm the selection.

6.6.11.2. Display Flip

In this submenu you can rotate the display by 180°.

01) Press the **UP/DOWN** buttons to select one of the 2 options:
- Regular: Regular view
- Top Down: The display is rotated by 180°
02) Press the **SET** button to confirm the selection.

6.6.11.3.Key Lock

In this submenu you can activate the display lock.

01) Press the **UP/DOWN** buttons to select one of the 2 options:
- Locked: The display lock is on. Do not press any button within 10 s of activating the lock. If you do so, the lock will be canceled. The selection remains but the display is not locked
- Unlocked: The access to the main menu remains unlocked

02) Press the **SET** button to confirm the selection.

Note:

If the display is locked, you need to enter a password to access the main menu. The default password is pressing the **UP/DOWN** buttons in the following order: **UP**, **DOWN**, **UP**, **DOWN**.

6.6.12. DMX Lost

In this menu you can determine the behavior of the device in case there is no DMX signal.

01) Press the **UP/DOWN** buttons to select one of the 3 options:

```
  DMX Lost
*Blackout
 Hold
 Manual
```
- Blackout: The device will black out the light output
- Hold: The device will use the last DMX signal correctly received
- Manual: The device will use the values selected in Manual Mode (see 6.6.3. Manual Mode on page 27)

02) Press the **SET** button to confirm the selection.

6.6.13. Information

In this menu you can view the parameters of the device.

01) Press the **UP/DOWN** buttons to select one of the 9 options:

```
   Information
*Operating Hours
 Source Hours
 Power Cycles
 Power
 LED Temperature
 RDM ID
 Product
 Device Label
 Version
```
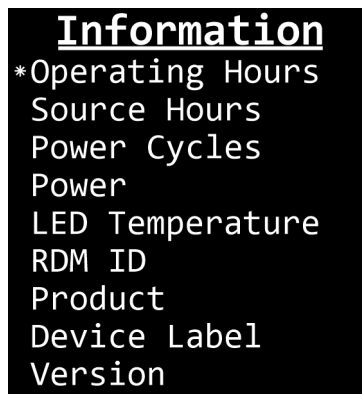

- Operating Hours: Shows the total hours of operation of the device
- Source Hours: Shows the total hours of operation of the LEDs
- Power Cycles: Provides information about how many times the device was powered up
- Power: Shows the real-time power consumption (see 6.6.13.1. Power Consumption) of the device
- LED Temperature: Provides information about the temperature of the LEDs
- RDM ID: Shows the RDM identification number of the device (29B4:0F5XXXXX)
- Product: Shows the name of the device
- Device Label: Shows the RDM device label of the device
- Version: Shows the current firmware version and hash code

02) Press the **SET** button to open each submenu and view the parameters.

6.6.13.1.Power Consumption

To see the real-time power consumption of the device, follow the steps below:

01) Turn on the Dimmer in Static Color mode (see <u>6.6.3.1. Static Color Mode</u> on page 27).
02) Do not press any button and wait 20 s until the display turns off.
03) Navigate to the Main Menu. The light output should still be on.
04) Open the Power submenu to view the real-time power consumption of the device.

Note:

If you open the Power submenu before the display turns off, you cannot view the real-time power consumption. If you exit the Manual menu via the control panel, the light output turns off and the display reads "0 W".

6.6.14. Send Settings

In this menu you can send the current settings of the device to other connected Raccoon devices.

01) Press the **UP/DOWN** buttons to select one of the 3 options:

```
Send Settings
*Abort
 Without DMX Addr
 With DMX Address
```

- Abort: Cancel the transfer of data and return to the previous screen
- Without DMX Addr: Send all settings, excluding the DMX starting address
- With DMX Address: Send all settings, including the DMX starting address
02) Press the **SET** button to confirm the selection. If you have selected to send the settings, the display shows a confirmation message that the settings are transferred

6.6.15. Factory Settings

In this menu you can reset the settings of the device to the default factory settings.

01) Press the **UP/DOWN** buttons to choose between:

```
Factory Settings
*Abort
 Reset Settings
```

- Abort: Cancel the reset and return to the previous screen
- Reset Settings: Reset all settings
02) Press the **SET** button to confirm your choice. If you have selected Reset Settings, the display shows a confirmation message that the defaults are restored.

6.7. DMX Channels

6.7.1. DMX Channels Overview

Function	Dimmer 1 CH	Pixel 3 CH	Basic 8 CH	XY 8 CH	RGB 12 CH	CMY 12 CH	HSI 10 CH	Raw 14 CH

6.8. RDM Information

This device supports RDM (see 6.8.2. Supported RDM PIDs (Parameter IDs)).

6.8.1. RDM Details

- Responder: 29B4:0F5XXXXX
- Manufacturer's ID: Infinity (Highlite International B.V.)
- Manufacturer Label: Infinity
- Model Description: Raccoon Junior P4/7
- Model ID: 245 (F5 hexadecmial)
- Device Label: Raccoon Junior P4/7

Note:

An RDM responder ID consists of 3 parts:

- 1st part – 4 digits – Manufacturer's ID
- 2nd part – 3 digits – Model ID
- 3rd part – 5 digits – Unique ID

The RDM responder IDs of all products of Highlite International start with the same 4 digits. The first 7 digits of the RDM responder ID for each model are the same. The last 5 digits are different for each device.

6.8.2. Supported RDM PIDs (Parameter IDs)

7. Troubleshooting

This troubleshooting guide contains solutions to problems which can be carried out by an ordinary person. The device does not contain user-serviceable parts.

Unauthorized modifications to the device will render the warranty void. Such modifications may result in injuries and material damage.

Refer servicing to instructed or skilled persons. Contact your Highlite International dealer in case the solution is not described in the table.

Problem	Probable cause(s)	Solution
The device does not function at all	No power to the device	• Make sure that the device is connected to the power supply and the cables are plugged in
	The internal fuse is blown	• Disconnect the device and contact your Highlite International dealer
The device responds erratically	The factory settings of the device are changed	• Reset the parameters of the device to the default factory settings (see 6.6.15. Factory Settings on page 33)
The device does not respond to DMX control	The controller is not connected	• Connect the controller
	The signal is reversed. The 5-pin DMX OUT of the controller does not match the DMX IN of the device	• Install a phase-reversing cable between the controller and the device
	The controller is defective	• Try using another controller
The device responds erratically to DMX control	Connections are defective	• Examine connections and cables. Correct defective connections. Repair or replace damaged cables
	The data link is not terminated with a 120 Ω termination plug	• Insert a termination plug in the DMX OUT connector of the last device on the link
	Incorrect addressing	• Make sure that the address settings are correct
	In case of a setup with multiple devices, one of the devices is defective and disturbs data transmission on the link	• To find the defective device, bypass one device at a time until normal operation is restored
No light or LEDs cut out intermittently	LEDs are damaged	• Disconnect the device and contact your Highlite International dealer
	The input power parameters of the device do not match local AC voltage and frequency	• Disconnect the device. Make sure that the local current, voltage and frequency match the input voltage, current and frequency specified on the information label on the device

8.   Maintenance

8.1.   Safety Instructions for Maintenance

> ⚠ **DANGER**
> **Electric shock caused by dangerous voltage inside**

Disconnect power supply before servicing or cleaning.

8.2.   Preventive Maintenance

> ❗ **Attention**
> **Before each use, examine the device visually for any defects.**

Make sure that:

- All screws used for installing the device or parts of the device are tightly fastened and are not corroded.
- The safety devices are not damaged.
- There are no deformations on housings, fixings and installation points.
- The lens is not cracked or damaged.
- The power cables are not damaged and do not show any material fatigue.

8.2.1.   Basic Cleaning Instructions

The external lens of the device must be cleaned periodically in order to optimize the light output. The cleaning schedule depends on the conditions at the site where the device is installed. When smoke or fog machines are used at the site, the device will need more frequent cleaning. On the other hand, if the device is installed in well-ventilated area, it will need less frequent cleaning. To establish a cleaning schedule, examine the device at regular intervals during the first 100 hours of operation.

To clean the device, follow the steps below:

01) Disconnect the device from the electrical power supply.
02) Allow the device to cool down for at least 15 minutes.
03) Remove the dust collected on the external surface with dry compressed air and a soft brush.
04) Clean the lens with a damp cloth. Use a mild detergent solution.
05) Dry the lens carefully with a lint-free cloth.
06) Clean the DMX and other connections with a damp cloth.

> ❗ **Attention**

- Do not immerse the device in liquid.
- Do not use alcohol or solvents.
- Make sure that the connections are fully dry before connecting the device to the power supply and to other devices.

8.3.   Corrective Maintenance

The device does not contain user-serviceable parts. Do not open the device and do not modify the device.

Refer repairs and servicing to instructed or skilled persons. Contact your Highlite International dealer for more information.

9. Deinstallation, Transportation and Storage

9.1. Instructions for Deinstallation

⚠️ **WARNING**
Incorrect deinstallation can cause serious injuries and damage of property.

- Let the device cool down before dismounting.
- Disconnect power supply before deinstallation.
- Always observe the national and site-specific regulations during deinstallation and derigging of the device.
- Wear personal protective equipment in compliance with the national and site-specific regulations.

9.2. Instructions for Transportation

- Use the original packaging to transport the device, if possible.
- Always observe the handling instructions printed on the outer carton box, for example: "Handle with care", "This side up", "Fragile".

9.3. Storage

- Clean the device before storing (see 8.2.1. Basic Cleaning Instructions on page 43).
- Store the device in the original packaging, if possible.

10. Disposal

Correct disposal of this product

Waste Electrical and Electronic Equipment

This symbol on the product, its packaging or documents indicates that the product shall not be treated as household waste. Dispose of this product by handing it to the respective collection point for recycling of electrical and electronic equipment. This is to avoid environmental damage or personal injury due to uncontrolled waste disposal. For more detailed information about recycling of this product contact the local authorities or the authorized dealer.

11. Approval

CE UKCA   Check the respective product page on the website of Highlite International (www.highlite.com) for an available declaration of conformity.
